The Daily Cafe — Website Changes

Summary of changes between the earlier draft and the updated version of the site

Overview

The updated version of The Daily Cafe website is a substantial rebuild of the earlier draft. The earlier draft used inline styling directly on each HTML tag, contained several malformed or unclosed tags, and had no external stylesheet or working script file. The updated version moves all styling into a proper stylesheet, corrects the markup, adds a new Enquiry page with a working form, and improves navigation, accessibility, and content across every page.

Files added or completed

- CSS/styles.css — a full stylesheet was added (the earlier draft's CSS folder existed but was empty, so all styling had been done with inline "style" attributes).
- enquiry.html — a brand-new page with a contact/enquiry form (name, email, phone, enquiry type, message) that did not exist in the earlier draft.
- DOCUMENTS/Proposal_The_Daily_Cafe.pdf and Website_Proposal_The_Daily_Cafe.pdf — proposal documents are included alongside the site files.
- A reference to a JAVA SCRIPT/nav.js file was added on the Gallery page, though the script file itself is not yet included in the project folder.

Change summary by page

Page	Area	What changed
All pages	Styling	Inline "style" attributes and a plain red background were replaced with an external stylesheet, a charcoal/gold colour theme, and Google Fonts (Playfair Display + Source Sans 3).
All pages	Structure	Added <meta charset> and <meta viewport> tags, a consistent header with logo + tagline, a mobile menu toggle button, and an "aria-current" marker for the active nav link.
All pages	Navigation	Added an "Enquiry" link to the nav menu on every page; fixed inconsistent link casing (Home.html → home.html, gallery.html → Gallery.html) and image folder casing (images/ → IMAGES/).
All pages	Footer	Footer copyright text corrected from "©ST10527760" to "© ST10527760" (missing space) on every page.
Home	Content	Page title changed from "Home page" to "Home | The Daily Cafe"; removed the logo image used as a full-page tiled background; heading simplified from underlined/italic styling to a clean styled heading.
About us	Content	Rewrote the page as three clearly separated sections (How we came to be / Our mission / Our target) instead of one run of headings and paragraphs with inconsistent tag nesting.
Services	Content	"Beverages and food" and "Convenience services" are now proper headings with correctly nested bullet lists, replacing lists that had opened inside the heading tags.
Gallery	Content	Six gallery photos now sit in a responsive grid with figure/figcaption labels (Coffee, Chocolate Shakes, Croissant, Chocolate Cake, Macaroons, Waffles) instead of a single stacked column of centred images with no captions.

Contact us	Content	Expanded the placeholder line "For more informant Contact" into a full "Get in touch" section with a working phone link and an email link; the earlier draft only listed a phone number.

Detailed changes by page

Home

- Removed the earlier draft's use of the cafe logo as a full-page background image.
- Replaced the underlined-italic hero heading with a plain, styled hero heading and tagline.
- Kept the welcome video, but the surrounding section now uses a proper hero layout instead of a body-level tag soup.

About us

- Fixed a heading tag that was opened as <h2> and incorrectly closed as </u> — the closing tags now match.
- Split the page into three separates, clearly headed sections (How we came to be, Our mission, Our target) rather than one continuous flow of mismatched tags.
- Removed the pink inline heading colour and red inline body background in favour of the site's stylesheet.

Services

- "Beverages and food" and "Convenience services" are now real section headings; in the earlier draft the <h3> heading tags wrapped around <ul> tags rather than sitting above the list.
- Bullet lists for both service categories now sit inside their own <ul> elements instead of being left unwrapped list items.

Gallery

- Moved from a single centred column of images to a responsive gallery grid.
- Added a caption under every photo (the earlier draft had no captions and one image's alt text read "Macroons" instead of "Macaroons").
- Added a reference to a JAVA SCRIPT/nav.js file for the gallery, though this script still needs to be added to the project.

Contact us

- Replaced the single unstyled line "For more informant Contact" and bare phone number with a proper "Get in touch" heading and introductory sentence.
- Added a clickable email link (thedailycafe@gmail.com) alongside the existing clickable phone number.

Enquiry (new page)

- Brand-new page, not present in the earlier draft.
- Includes a full enquiry form: full name, email address, phone number, an enquiry-type dropdown (general, catering/bookings, feedback, other), and a message box.
- Shows a confirmation message ("Thanks! Your enquiry has been noted...") once the form is submitted.

Outstanding items

- JAVA SCRIPT/nav.js is referenced on the Gallery page but the file itself is not yet present in either version of the project — it will need to be added for that script tag to do anything.
- The DOCUMENTS folder includes a temporary Word lock file (~$bsite_Proposal_The_Daily_Cafe.pdf) alongside the proposal PDFs, left over from having the proposal open while zipping the folder — safe to delete.
